Professional Experience

Apxor Technology Hyderabad, India
Associate Software Engineer *Aug 2025 – Present*

- Partnered with client teams at **GCash, Porter and ICICI Bank** (apps serving **100M+ users**) to scope analytics needs, owning client issues from first report to production fix across web, Android and iOS.
- Architected an agentic analytics assistant (**RAG, LangGraph**, FastAPI) that plans, uses tools and keeps memory to turn natural language questions into charts, using a **Chroma** vector DB of **500+ event types**.
- Secured it for enterprise data with **guardrails**, **prompt injection** detection and **PII masking**.
- Rewrote legacy Scala and Java microservices in **Go** (goroutine concurrency, pprof), cutting **p99 latency 110 to 75 ms** (32%), memory per pod **400 to 65 MB** (84%) and startup **9 s to 1 s**, with **32%** more throughput per pod.
- Engineered an **idempotent** Go service with safe retries streaming client events as **Parquet** through **Kafka** to client GCP or AWS buckets, run by **40 consumers** holding lag near zero, plus a daily Spark batch job.
- Delivered **zero downtime** Kubernetes rollouts on GKE and AWS EKS via GitOps (ArgoCD, Helm, Tanka), with GitHub Actions CI/CD and infrastructure as code in **Terraform**, with IAM and secrets.
- Kept data infrastructure healthy: **Redis (21 nodes)** at **~9M commands/sec** for **3,600+ clients**, ClickHouse at **~20K rows/sec**, Kafka groups of up to **116 consumers**, tracked on golden signals in Grafana.
- Resolved **100+ production incidents** on call through **root cause analysis** and postmortems that prevented repeats.
- Built **React and TypeScript** dashboards and a virtualized rendering library for data grids of **10,000+ rows**.
- Adopted **AI coding agents** (Claude Code, subagents, MCP) for coding, testing and docs, with full review.

Zengen LLP Chennai, India
Software Development Intern *Jan 2025 – Jun 2025*

- Delivered CRM features across the **React** frontend and Node.js REST APIs, with live notifications.
- Shaped service boundaries as the product grew and wrote reusable utilities adopted across the codebase.

Projects

Latte: AI Sales Call Compliance and Coaching | *TypeScript*, *React*, *PostgreSQL*, *LLM APIs*, *Whisper* Live app | GitHub

- Compliance platform that audits **100%** of recorded sales calls instead of a sample and flags breaches with evidence.
- Designed the pipeline: transcription of each speaker (Whisper, Sarvam for **10 Indian languages**), one **LLM judge** call with a strict JSON schema, and **PII masking** behind SSO.
- Exposed it as a platform: **REST API** with scoped keys, signed webhooks and **SDKs in 4 languages**.
- Controlled cost and quality with **queued** workers, **batches of up to 500** calls and a model gateway enforcing **token caps and rate limits**, plus **evals** on 20 labelled calls that gate every prompt or model change in CI.

Nemo: Agentic RAG Assistant | *Go*, *Python*, *FastAPI*, *LangChain*, *Kafka*, *Kubernetes* GitHub

- Answers questions over team documents and runs multistep tasks with **tool calling agents** on **3 LLM providers**.
- Built as **6 services** behind a **Go gateway**: **RAG** over Chroma, an agent engine with a tool registry, Keycloak service auth, Vault secrets and **Temporal** durable workflows on Kubernetes.

Technical Skills

Languages: Go, Python, TypeScript, JavaScript, SQL, Java
AI and LLMs: RAG, LangGraph, LangChain, LLM APIs, embeddings, Chroma, AI agents, tool use, guardrails, evals
Agentic Tooling: Claude Code, agents, MCPs, subagents, connectors, tool calling, agent loop, skills
Backend and Data: Go, FastAPI, REST, gRPC, Kafka, Temporal, Spark, Node.js, PostgreSQL, ClickHouse, MongoDB, Redis
Frontend: React, Next.js, TypeScript, TanStack Query, Zustand
DevOps and Reliability: Kubernetes, Docker, Helm, ArgoCD, Terraform, CI/CD, AWS, GCP, Prometheus, Grafana, Loki

Education

Bachelor of Technology in Computer Science and Engineering 2021 – 2025
Aditya College of Engineering and Technology, Surampalem, India

Certifications and Achievements

- Red Hat Certified System Administrator (RHCSA) | AWS Certified Cloud Practitioner
- CodeChef 3 Star (1637) | 500+ LeetCode problems | Trained 300+ students in C++ and DSA at Technical Hub (2023)
